**Top 10 Ranking Requirements Score™**

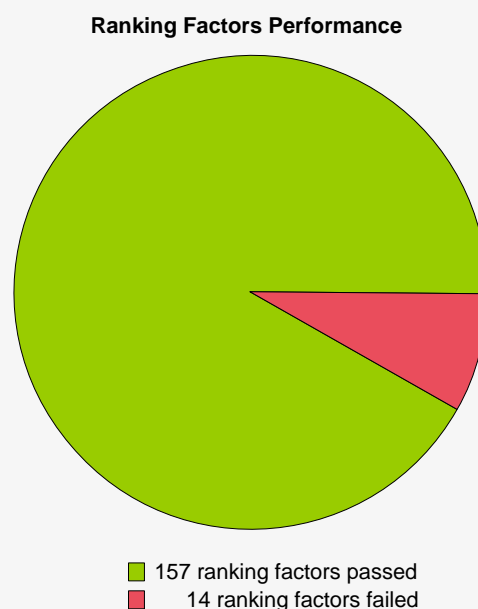

The Top 10 Ranking Requirements Score™ of 77% means that the web page [www.hellomails.com](http://www.hellomails.com) meets only 77% of the requirements for a top 10 ranking on Google.com (without Places) for the search term "Bulk Email marketing Servers".

Note that not all ranking factors are weighted equally, and that there are some ranking factors that cannot be taken into account because search engines do not reveal the necessary data.

## Search engine ranking factors performance

Ranking Factor Importance	Factors Passed	Factors Failed
Essential (weighted most):	27	4
Very Important:	13	0
Important:	45	7
Moderately Important:	59	2
Slightly Important:	13	1
Total:	157	14

	Competitors	Your Site	Advice	
Number of keywords:	0 to 7	4	OK	OK
Keyword density:	0% to 13%	9%	OK	OK

## Number of backlinks

### Essential

This chapter measures how many web pages link to your website domain according to the data providers Alexa.com and SEOprouler.com. The SEOprouler service provides the number of unique linking domains, not the number of all linking pages.

Keep in mind that the raw number of linking web pages is not as important as the quality of the web pages that link to your site.

### Number of backlinks according to these data providers (the more the better)

	Alexa	SEOprouler (unique backlinks)	Peak Value
To Your Site:	61	80	80
To Site 1:	1,722	381	1,722
To Site 2:	43	42	43
To Site 3:	590	688	688
To Site 4:	61	14	61
To Site 5:	587	968	968
To Site 6:	49	33	49
To Site 7:	134	161	161
To Site 8:	117	103	117
To Site 9:	193	504	504
To Site 10:	74	50	74
Range:	43 to 1,722	14 to 968	43 to 1,722

### Advice for the number of backlinks

In average, less web pages link to your page than to the top ranked pages. The average link popularity of the top ranked pages is 438, the link popularity of your web page is 80. You must increase the number of web pages from different domains that link to your web site. Keep in mind that all search engines also evaluate the anchor texts and the quality of the web pages that link to your web site.

&lt;&lt;

## Anchor texts of backlinks

### Essential

Backlinks are links from other web sites to your site. If many other sites link to your site, then search engines consider your site to be important. However, the number of links is not as important as is the relevance of the linking page and the anchor text used in linking to your site.

This chapter lists the most popular anchor texts used in linking to your site, as well as a sample of the web pages that link to your site, along with the anchor text.

### Most popular anchor texts used to link to your site

Anchor Text	Popularity
<a href="http://www.hellomails.com">http://www.hellomails.com</a>	5.4%
255056. hellomails.com	3.3%

### Advice for the anchor texts of backlinks

To get a high ranking on Google.com (without Places), make sure that the web pages that link to your site use the search term "Bulk Email marketing Servers" in their anchor texts. The more links to your web site contain "Bulk Email marketing Servers" (or a part of it) in the anchor text, the more likely it is that your web site will get a high ranking on Google.com (without Places) for that search term.

It is advisable to use different but related keywords for the anchor texts. If all links to your web site use exactly the

**Advice for the anchor texts of backlinks**

same anchor text, then Google.com (without Places) might lower your rankings because of unnatural linking patterns.

In addition, the quality and reputation of the web pages that link to your site is very important to the search engines.

At least 10% of the analyzed backlink anchor texts contain the search term "Bulk Email marketing Servers". This is good.

OK

At least 20% of the analyzed backlink anchor texts contain the search term "Bulk Email marketing Servers". This is good.

OK

At least 40% of the analyzed backlink anchor texts contain the search term "Bulk Email marketing Servers". This is good.

OK

At least 60% of the analyzed backlink anchor texts contain the search term "Bulk Email marketing Servers". This is good.

OK

Less than 80% of the analyzed backlink anchor texts contain the search term "Bulk Email marketing Servers". You must increase the number of backlinks or anchor texts that contain that search term.

&lt;&lt;

## Keyword use in body text

### Essential

The body text is the text on your web page that can be seen by people in their web browsers. It does not include HTML commands, comments, etc. The more visible text there is on a web page, the more a search engine can index. The calculations include spaces and punctuation marks.

## Age of web site

### Very Important

Spam sites often come and go quickly. For this reason, search engines tend to trust a web site that has been around for a long time over one that is brand new. The age of the domain is seen as a sign of trustworthiness because it cannot be faked. The data is provided by Alexa.com and SEOprofiler.com.

### Dates of the domain registration or of the first contents

	URL	Registration Date

### Advice for the web site age

Your web site is about 8 years old. This is very good because the older your web site, the better it is for your rankings on Google.com (without Places).

OK

## Keyword use in H1 headline texts

### Very Important

H1 headline texts are the texts that are written between the <h1>...</h1> tags in the HTML code of a web page. Some search engines give extra relevance to search terms that appear in the headline texts. This chapter examines if this applies to Google.com (without Places), too.

Example: <h1>your very big headline text</h1>

Keyword density:	0% to 10%	0%	You could increase the keyword density for the keywords "Bulk", "Email", "marketing" or "Servers" but this is optional.	<

## Keyword use in domain name

### Important

The domain name is the main part of the web page address. This chapter tries to find out if Google.com (without Places) gives extra relevance to search terms within the domain name.

Example: "your-keyword" is the domain name of <http://www.your-keyword.com>

### Their contents

Rank	Words In Domain Name	URL
1	mailjet	<a href="https://www.mailjet.com/">https://www.mailjet.com/</a>

### Your contents

hellomails (Domain name: "hellomails.com")

### Advice for the domain name

The domain name hellomails.com does not contain the search term "Bulk Email marketing Servers".

If you have a young web site with only a few backlinks, then consider registering a new domain name that contains the search term "Bulk Email marketing Servers".

If you have an established web site with a lot of backlinks, then you must compensate by improving the other search engine ranking factors.

## Keyword use in page URL

### Important

The page URL is the part after the domain name in the web page address. This chapter tries to find out if Google.com (without Places) gives extra relevance to search terms within the page URL. Separate your search terms in the page URL with slashes, dashes or underscores.

Example: "keyword/another-keyword.htm" is the page URL of <http://www.domain.com/keyword/another-keyword.htm>

Keyword density:	0% to 14%	0%	You could increase the keyword density for the keywords "Bulk", "Email", "marketing" or "Servers" but this is optional.	<

## Mentions on social sites

### Important

On social network sites, people decide which web sites are popular. This means that the popularity on social network sites cannot be easily influenced. For this reason, search engines might trust web sites more if they are popular on social networks. ("n/a" means "data not available".)

### Mentions on social sites (the more the better)

	Delicious.com	Facebook Mentions	Google +1	Twitter Tweets	Total
To Your Site:	0	1	0	1	2
To Site 1:	277	130	177	549	1,133
To Site 2:	0	12	0	1	13
To Site 3:	32	3	433	6	474
To Site 4:	0	5	3	2	10
To Site 5:	367	18	0	52	437
To Site 6:	0	138	11	17	166
To Site 7:	0	2	0	0	2
To Site 8:	2	51	1	12	66
To Site 9:	76	53	155	0	284
To Site 10:	0	8	0	5	13
Range:	0 to 367	1 to 138	0 to 433	0 to 549	2 to 1,133

### Advice for the mentions on social sites

In average, less web pages link to your page than to the top ranked pages on these social networks. The average link popularity of the top ranked pages is 236, the link popularity of your web page is 2. You must increase the number of web pages that link to your web site on these social networks.

&lt;&lt;

## Server speed

### Important

Popular web sites often have faster server response times compared to smaller unimportant sites. In addition, most search engines index more pages from fast web sites. This chapter shows you how long it takes on average for web pages on the top ranked sites to load. The data is based on the average server speed of the last 30 days and is provided by Alexa.com ("n/a" means that Alexa.com does not have data about your server speed).

### Server speed results

#### Average Page Load Time (measured in seconds, the lower the better)

Your Site	1	2	3	4	5	6	7	8	9	10	Range
0.38s	1.25s	2.01s	1.97s	2.47s	0.55s	1.89s	1.79s	2.41s	1.44s	3.10s	0.55s to 3.10s

#### Server Speed Relative To Other Servers On The Internet (the faster the better)

Your Site	1	2	3	4	5	6	7	8	9	10	Range
very fast: top 4%	fast: top 35%	average: bottom 40%	average: bottom 40%	slow: bottom 30%	very fast: top 8%	average: bottom 40%	average: bottom 45%	slow: bottom 30%	average: top 45%	very slow: bottom 15%	very slow: bottom 15% to very fast: top 8%

### Advice for the server speed

Your web site is fast. This is very good because the faster your web site, the better it could be for your rankings on Google.com (without Places).

OK

## Keyword use in H2-H6 headline texts

### Important

H2, H3, H4, H5 and H6 headline texts are the texts that are written between the <h2>...</h2>, <h3>...</h3>, etc. tags in the HTML code of your web page. Some search engines give extra relevance to search terms that appear in the headline texts. This chapter examines if this applies to Google.com (without Places), too.

Example: <h3>your big headline text</h3>

### Your contents

Keyword density:	0% to 10%	17%	The keyword density for the keywords "Bulk", "Email", "marketing" or "Servers" is too high. It should be 10% at maximum. Consider adding more text to lower the keyword density for these words.	<<

## Keyword use in IMG ALT attributes

### Important

The <img alt> attribute defines an alternative text for an image when the user uses a text browser or when the user has turned off the display of images in the web browser application. Microsoft's Internet Explorer displays the alternative text if the user puts the cursor over the graphic. This chapter tries to find out if it makes sense to include the search term in the <img alt> attributes to improve your rankings.

Example:

## Top level domain of web site

### Important

Web sites with certain top level domains (TLD) are statistically more likely to contain higher quality, trustworthy contents. For this reason, search engines might prefer web sites with restricted TLD (.edu, .gov., .mil) over younger TLD (e.g., .biz, .info, .jobs). In addition, country code TLD (e.g., .ca, .de, .fr) are often preferred in the country's local search results.

### Top level domain results

Your Site	1	2	3	4	5	6	7	8	9	10
.com	.com	.com	.com	.net	.com	.com	.com	.com	.com	.com

### Advice for the top level domain of your web site

Your web site URL [www.hellomails.com](http://www.hellomails.com) contains the often used top level domain .com. This is neither good nor bad for your rankings on Google.com (without Places).

OK

## Keyword use in bold body text

### Important

The body text is the text on your web page that can be seen by people in their web browsers. The bold body text uses a darker and heavier face than the regular type face. It appears between `<b>...</b>` or `<strong>...</strong>` tags in the HTML source of your web page. CSS is not recognized. The statistics include spaces and punctuation marks.

## Number of visitors to the site

### Important

Search engines might look at web site usage data, such as the number of visitors to your site, to determine if your site is reputable and contains popular contents. The Alexa.com traffic rank is based on three months of aggregated traffic data from millions of Alexa Toolbar users and is a combined measure of page views and number of site visitors.

### Alexa.com Traffic Rank results (the lower the better)

	URL	Alexa Traffic Rank

10	<a href="http://www.curvve.com/blog/guides/2014/review-of-the-top-4-online-bulk-email-marketing-services-in-2014/">http://www.curvve.com/blog/guides/2014/review-of-the-top-4-online-bulk-email-marketing-services-in-2014/</a>	Rank #163,514
Range		5,136 to 563,046 (average rank: #211,839)

### Advice for the number of visitors to your site

Your web site [www.hellomails.com](http://www.hellomails.com) does not appear to attract many visitors because your traffic rank is above #100,000 and you have less visitors than the average of your competitors. This could be disadvantageous to your rankings on Google.com (without Places).

&lt;&lt;

## Keyword use in same domain anchor texts

### Moderately Important

Anchor texts are words and sentences that are used as links. Same domain anchor texts are the anchor texts of the links that point to a web page on the same domain. This chapter examines if Google.com (without Places) takes search terms in same domain anchor texts into account.

Example: The HTML tag `<a href="contact.htm">Contact information</a>` contains the same domain anchor text "Contact information".

## Keyword use in outbound anchor texts

### Moderately Important

Anchor texts are words and sentences that are used as links. Outbound anchor texts are the texts within the <a>...</a> tags when the <a> tag links to a web page on a different domain. This chapter examines if Google.com (without Places) gives relevance to search terms in outbound anchor texts.

Example: The HTML tag <a href="http://www.not-your-site.com/about.htm">About the company</a> contains the outbound anchor text "About the company".

## Keyword use in meta description

### Moderately Important

The Meta Description tag allows you to describe your web page. This chapter tries to find out if Google.com (without Places) takes the Meta Description tag into account. Some search engines display the text to the user in the search results.

Example: <meta name="description" content="This sentence describes the contents of your web site.">

Even if the Meta Description tag might not be important for ranking purposes, you should use the Meta Description tag to make sure that your web site is displayed with an attractive description in the search results.

Keyword density:	0% to 8%	6%	OK	OK

## Number of trailing slashes in URL

### Moderately Important

The number of trailing slashes (/) in the URL indicates where a web page falls in a site's overall hierarchy. If the URL contains many trailing slashes, meaning it is placed in a sub-sub-directory, then the webmaster does not seem to think that the page is important in relation to the other pages.

### Number of trailing slashes

Your Site	1	2	3	4	5	6	7	8	9	10	Range
0	0	0	0	0	1	0	0	1	0	4	0 to 4

### Advice for the number of trailing slashes in your web site URL

The URL [www.hellomails.com](http://www.hellomails.com) does not contain more or less trailing slashes than the top ranked pages. This means that you do not have to change the number of trailing slashes in your URL.

OK

## HTML validation of web page to W3C standards

### Slightly Important

Web pages are written in special languages called HTML and CSS. If there are errors in the HTML code of your web page, then search engines might not be able to read everything of your web page. You should also check the CSS code of your web page (see link below).

### Validation results

	Validity
HTML:	47 errors, not valid <a href="http://validator.w3.org/check?uri=http://www.hellomails.com/">http://validator.w3.org/check?uri=http://www.hellomails.com/</a>
CSS:	<a href="http://jigsaw.w3.org/css-validator/validator?uri=http://www.hellomails.com/">http://jigsaw.w3.org/css-validator/validator?uri=http://www.hellomails.com/</a>

### Advice regarding the validity of your web site

The HTML code validation of your web page [www.hellomails.com](http://www.hellomails.com) failed. This means that Google.com (without Places) might not be able to read your web page. You should fix any HTML errors.

## Readability level of web page

### Slightly Important

The Flesch Reading Ease test is a United States governmental standard to determine how easy a text is to read. It measures the approximate level of education necessary to understand the web page content. Higher scores indicate the text that is easier to read, and lower numbers mark harder-to-read texts. Scores among different languages are not comparable.

### Readability results

#### Flesch Reading Ease Score (0-100, higher score means that the text is easier to understand)

Your Site	1	2	3	4	5	6	7	8	9	10	Range
61	54	46	38	52	69	71	56	79	65	55	38 to 79

#### Flesch-Kincaid Grade Level (shows the number of years of education required to understand the text)

Your Site	1	2	3	4	5	6	7	8	9	10	Range
6	9	12	13	11	8	6	9	4	6	11	4 to 13

### Advice for the readability of your web site

The Flesch Reading Ease Score of your web page [www.hellomails.com](http://www.hellomails.com) is 61. A score of 60 to 80 is considered to be optimal. This means that the text of your web page is easy to comprehend.

OK

## Keyword use in the first sentence of the body text

### Slightly Important

The first sentence of the body text is the first sentence after the <body> tag in the HTML code of your web page. Some search engines give more relevance to search terms when they appear in the first sentence. Some will use your first sentence as the description of your page on the search result page.

Example: <body>Here goes the first sentence. This text is not the first sentence.

## Search engine compatibility

This chapter examines the general search engine compatibility of your web page.

### Advice

Search engines need text to index your web pages, to determine the theme of your web site and to produce a site summary. They cannot read what is written on your graphical images or in a Flash movie. Google recommends to create a useful, information-rich site. Fresh, continuously updated content is one of the best ways to ensure that search engines return to your web site (and your visitors, too). Your web page "www.hellomails.com" contains 383 words which should be enough for search engines.	OK
Your web page doesn't use the Meta Refresh tag so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use the Meta Robots tag so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use the Meta Title tag so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use any Dublin Core meta tags so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use any Meta tags twice so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use the <title> tag twice so there won't be any problems with search engines in this aspect.	OK
Your web page uses script code in an external file so you've already minimized the problems with scripts and the search engines.	OK
Your web page uses style sheet code in an external file so you've already minimized the problems with style sheets and the search engines.	OK
Your web page doesn't use frames so there won't be any problems with the search engines in this aspect.	OK
Some search engines consider tiny text (i.e. font size 1) as an attempt to fool the search engines. Some webmasters have abused tiny text in the past to hide dozens of keywords on a web page that human web surfers cannot see. Your web page doesn't seem to use tiny text so there shouldn't be any problems with the search engines in this aspect.	OK
Your web page URL "www.hellomails.com" doesn't indicate a dynamically served web page so there shouldn't be any problems with the search engines in this aspect.	OK

## Factors that could prevent your top ranking

Some ranking factors cannot be measured because the search engines do not reveal the necessary data, or it would be extremely time-consuming to measure the data. Make sure you pay attention to the following factors because they could prevent a top ranking for [www.hellomails.com](http://www.hellomails.com) on [Google.com](http://Google.com) (without Places).

### Advice

#### Backlinks to your web page

Are the web pages linking to your web page relevant to the search term "Bulk Email marketing Servers"?

How fast does your web page get new links pointing to it?

Do the web sites which link to your page belong to the same content category?

Since when do the links to your page exist?

Is the text surrounding the link to your page relevant to the search term "Bulk Email marketing Servers"?

#### Your web page

How many important links from your other pages point to your web page?

Do the links on your web page point to high quality, topically-related pages?

How often and how many changes do you make to your web page over time? Is your content up-to-date?

How often and how many web pages do you add to your web site?

How long do your visitors spend time on your web page?

#### Search engine result page

Do your competitors on the search engine result page get a manual ranking boost by [Google.com](http://Google.com) (without Places), for example [Amazon](http://Amazon.com) or [Wikipedia](http://Wikipedia.com)?

How many visitors of the search engine result pages click through to your page?

How often do search engine visitors search for your company name or web page URL on [Google.com](http://Google.com) (without Places)?

#### Negative ranking factors (you should be able to say "no" to all the following questions)

Is your content very similar or a duplicate of existing content?

Is your server often down when search engine crawlers try to access it?

Do you link to web sites that do not deserve a link?

Do you use the same title or meta tags for many web pages?

Do you overuse the same keyword or key phrase?

Do you participate in link schemes?

Do you actively sell links on your web page?

Do a majority of your backlinks come from low quality or spam sites?

Does your web page have any spelling or grammar mistakes?

## Table: Number of keywords

This chapter lists the analyzed keyword ranking factors in tabular form.

(AT = anchor text, LU = link URL, SD = same domain.)

## Table: Ranking factors digest

This chapter shows some of the search engine ranking factors in tabular form. Some of the values may have been abbreviated by using "k" which means that the value must be multiplied by 1000. ("n/a" means "data not available".)

Digest												
	Your Site	1	2	3	4	5	6	7	8	9	10	Range
